

Bastiaan Lammers

Name: Mr. Bastiaan M. Lammers (B. Sc.)
Company: Boskalis Dolman bv / Stuyvesant Environmental Contracting Inc.
Position: Project Development Manager

Mr. Lammers has been working for Boskalis Dolman for the past 8 years. Of those 8 years, he spent 4 years working in Northern America. Boskalis Dolman is the environmental specialist of the Netherlands based Royal Boskalis Westminster Group. Stuyvesant Environmental Contracting is the North American subsidiary of Boskalis Dolman bv.

Mr. Lammers graduated in 1999 from Larenstein International University in Velp, The Netherlands. He obtained a bachelor degree in Hydrology and Water Management.

Mr. Lammers was the project manager on the Miami River 15' Maintenance Dredging Project in Miami, Florida. This project included dredging, sand separation, and mechanical dewatering of approximately 550,000 m³ of contaminated sediment. During the past few years, his focus has shifted from project management to project development. In this position, Mr. Lammers was involved in the start-up of the Fox River Cleanup Project in Green Bay, Wisconsin. This project is one of the largest sediment remediation projects in the world with a total of more than 3 million m³ of PCB contaminated sediments which will be removed from the Fox River and delivered to the project-tailored processing facility. The process consists of screening, sand separation, and mechanical dewatering using membrane filter presses. The project is expected to last 8 years.

The main tasks for Mr. Lammers at this moment are business development for the markets in the United States and Canada in the field of soil and sediment remediation and management.
